Hi!

My name is Adriel. I am 19 years old, and I study mathematics at the university of Groningen. I've been coding for about 6 years, and I have a strong interest in type systems, compilers, and everything functional programming. I have about 1 year of industry experience, and I have spent the rest building numerous side projects.

During the summer of last year, I was able to work full-time for visonum, which helped me pay for the first year of my education. Furthermore, the opportunity taught me a lot of skills and provided me with valuable experience.

I am looking to do the same during the summer of 2023, and your company looks like a perfect fit.

Can't wait to hear back from you!

– Adriel
